PROFESSIONAL SUMMARY

Detail-oriented Computer Science Engineering student and Full Stack Developer specializing in the MERN Stack (MongoDB, Express.js, React.js, Node.js) and Data Structures & Algorithms. Robust foundation in core Software Engineering fundamentals, Object-Oriented Programming, and scalable REST API development. Passionate about building high-performance web applications, optimizing backend workflows, and solving complex algorithmic challenges in fast-paced product development environments.

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Java, Python, JavaScript (ES6+)
- **Web Development:** MongoDB, Express.js, React.js, Node.js, REST APIs, HTML5, CSS3
- **Core Computer Science:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), System Design
- **Tools & Platforms:** Git, GitHub, Postman, Cloudinary, Vercel, Netlify, Render

TECHNICAL PROJECTS

RepScore – Online Reputation Checker & Rating Platform

[GitHub](#) | [Live Demo](#)

- Engineered a full-stack online reputation analysis and dynamic rating platform using the MERN architecture to process user sentiment.
- Designed secure, scalable REST APIs using Node.js and Express.js to manage relational review workflows and data streams.

Forever – E-Commerce Platform

[GitHub](#) | [Admin](#) | [Frontend](#)

- Architected a modular e-commerce ecosystem featuring a separate, high-utility Admin Panel for product catalog and order management.
- Implemented high-performance search, multi-attribute filtering algorithms, and scalable REST APIs for dynamic transactions.

ChatApp – Real-Time Messaging Application

[GitHub](#) | [Live Demo](#)

- Built an instantaneous real-time messaging application with component-driven React.js to increase active user engagement.
- Established robust token-based authentication and authorization systems to protect highly concurrent user communication channels.

Tomato – Food Delivery Application

[GitHub](#) | [Live Demo](#)

- Developed an end-to-end food ordering platform featuring structured user authentication and an intuitive shopping cart experience.
- Constructed responsive, pixel-perfect frontend layouts integrated smoothly with backend API data models.

EDUCATION

University of Lucknow

Lucknow, UP, India

Bachelor of Technology (B.Tech) – Computer Science Engineering

Expected Graduation: 2028 (Current: 2nd Year)

Key Coursework: Data Structures & Algorithms, Object-Oriented Programming (OOP) with C++, Database Management Systems (DBMS), Operating Systems.

ACHIEVEMENTS & CERTIFICATIONS

- **Problem Solving:** Solved 200+ comprehensive Data Structures & Algorithms problems across LeetCode and GeeksforGeeks platforms utilizing C++.
- **Full Stack Proficiency:** Built and deployed 4+ complex full-stack applications leveraging production-ready MERN Stack paradigms.
- **Version Control:** Expert in advanced Git-based version control workflows, branch management, and collaborative open-source contributions.
